

Krupa Tiwari,

Anshu Tiwari's Mom,

is very thankful to Dr. Ajinkya and his team at GDCH. Mumbai for making Anshu's dental visit fun and comfortable. Anshu has autism and usually keeps to herself. The team used special toys and a special room to make her feel safe and at home during her treatment.

This made a big difference for Anshu, especially since she had a bad experience before.

Krupa is grateful to the department for taking such good care of her daughter.

Dear Everyone,

I am Dr Simran Patel, proud mother to Dhruvi Patel a delightful daughter diagnosed with Autism.

Recently, Dhruvi turned six & had her first dental visit. My friend, Dr Vilas Takate, emphasized SANE (sensory adapted dental environment) room at Department of Paediatrics & Preventive Dentistry APMC Mumbai.

SANE Room captivated Dhruvi with its bright neon stars, colorful rainbow lights & an aquarium. This was so soothing for her.

We are deeply thankful to Dr Takate & his team.

Warm Regards,
Simran & Dhruvi
Patel

Dear Drs of Department 36,
Government Dental College & Hospital,
Mumbai

I am writing to express my immense gratitude for the wonderful experience of my 4 yrs old daughter, Naira Khan, had at your clinic recently. Her mother accompanied her & she couldn't stop talking abt how cool your hospital is after they returned home.

Naira was particularly fascinated by glowing octopus & stars in the clinic, as well as the TV on ceiling playing her fav show, Coocomelon. Normally, she is scared of visiting any Dr., but the inviting & child friendly environment of your dental clinic made her feel comfortable & completely eliminated her fears.

I am truly thankful to all the Drs who helped Naira overcome her fear & made her dental visit enjoyable. Your thoughtful approach & dedication have made a significant diff for us.

We are eagerly looking forward to her next appointment

With heartfelt thanks,
Mohd. Khan.

Hello,

Myself Rakesh Tiwari, father of Arman Tiwari.

My son is 5 yrs old & had tooth pain since 2 days. I took him to GDCH Mumbai to treat his tooth. I got early appointment & doctors treated my child with care. His experience under SADE room was very good & painless.

Doctors showed him stars on the ceiling & laser show which he enjoyed. He liked the music & cartoon playing on the TV.

I like how sweet the doctors here are & would visit again.

Thank you,
Rakesh Tiwari

Hello, good evening,

I am writing on behalf of my 4.5 years old son, Rohan, who recently had a tooth extracted at your excellent dental hospital, the Department of Pediatric and Preventive Dentistry, GDCH Mumbai.

Rohan is always energetic and often getting into mischief. It's tough to get him to listen or stay away from his phone. For the past six months, he had been suffering from tooth pain, and his upper teeth were badly damaged. He was teased at preschool and sometimes didn't want to go to school.

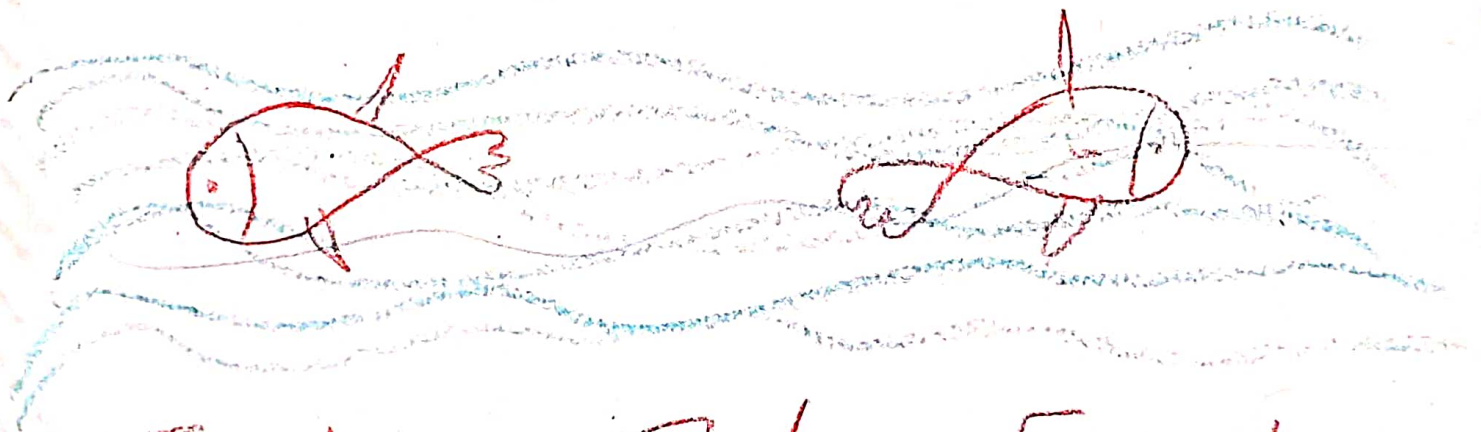

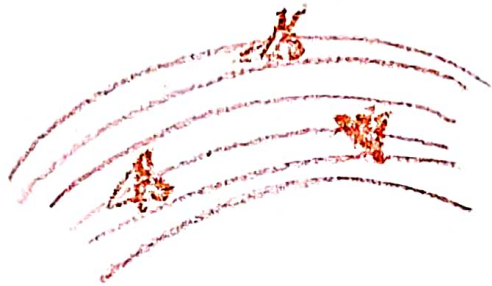

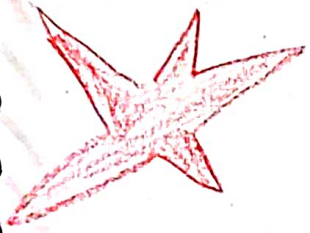

We visited several clinics, but Rohan would always throw tantrums. We were advised to restrain him or use anesthesia, which scared us. We didn't want that for our child.

Then we heard about new SAPE room at GDCH Mumbai, where dental treatments are done under stars and with fun distractions. Before starting we were briefed and we decided to try it.

Rohan was satisfied and so fascinated by the glowing things and music that he didn't even notice the painless treatment was done quickly. We were amazed and grateful for this wonderful experience that helped Rohan through a tough time.

Thank you,
Vijay Chaudhary.

Hello Dr Ajinkya

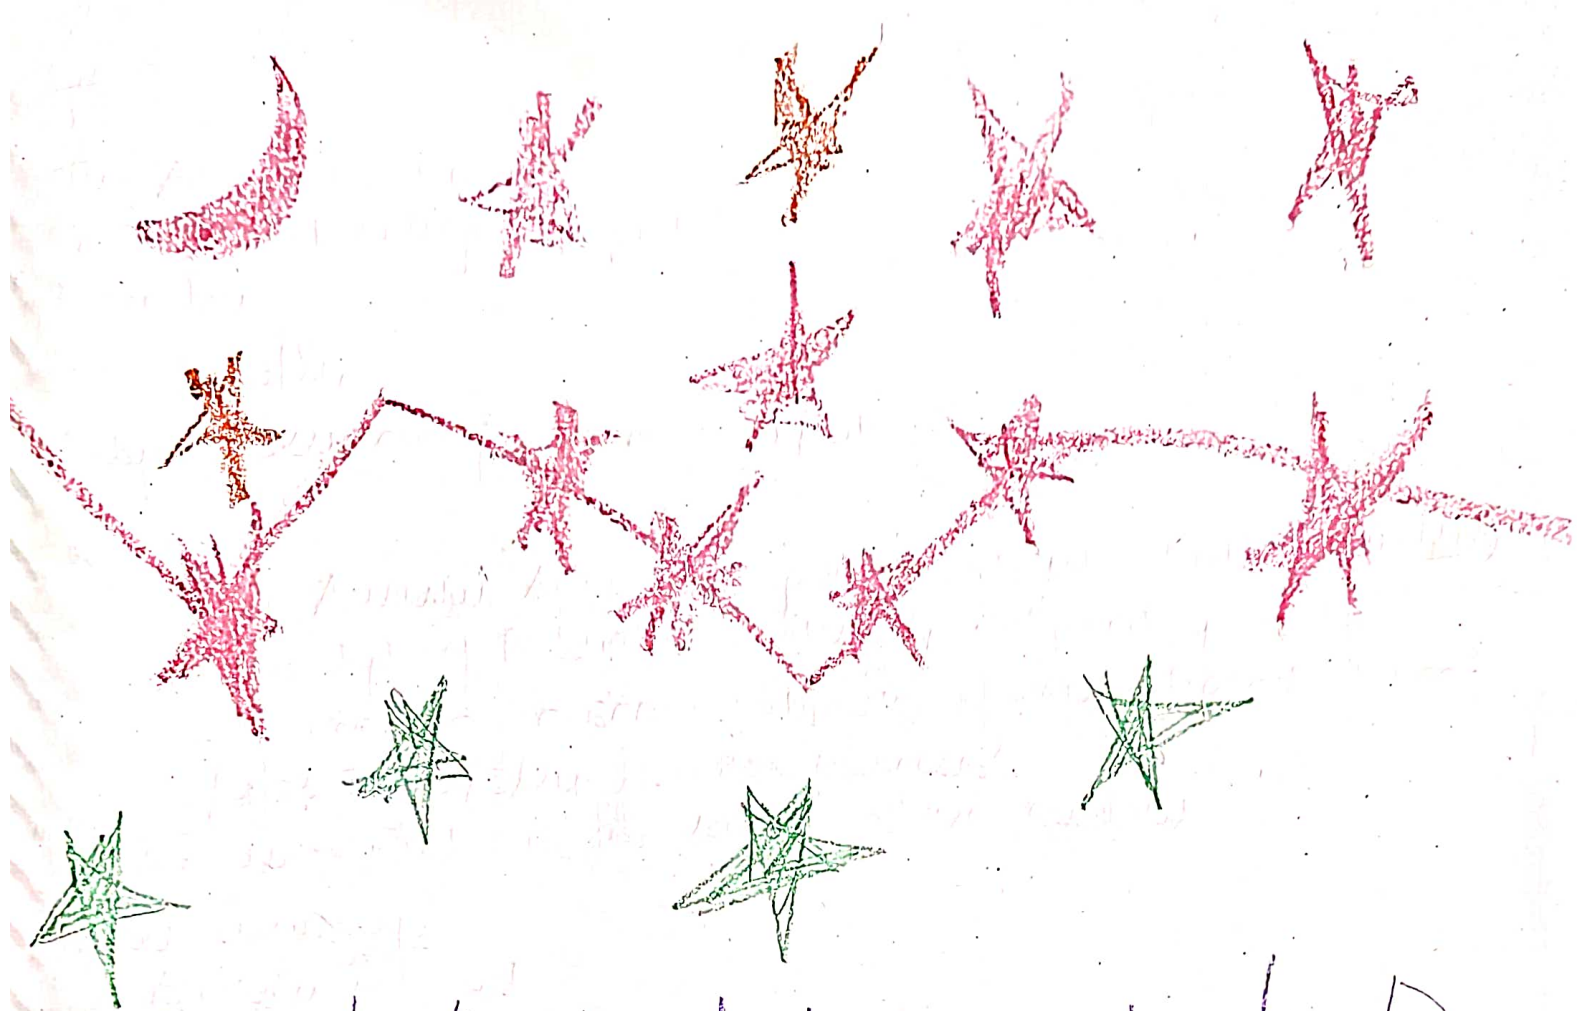

Thank you Doctor for Nice
And Best Treatment.

Bye Bye

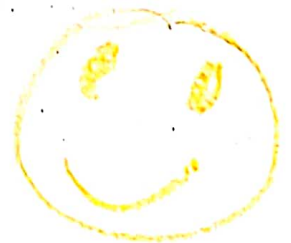

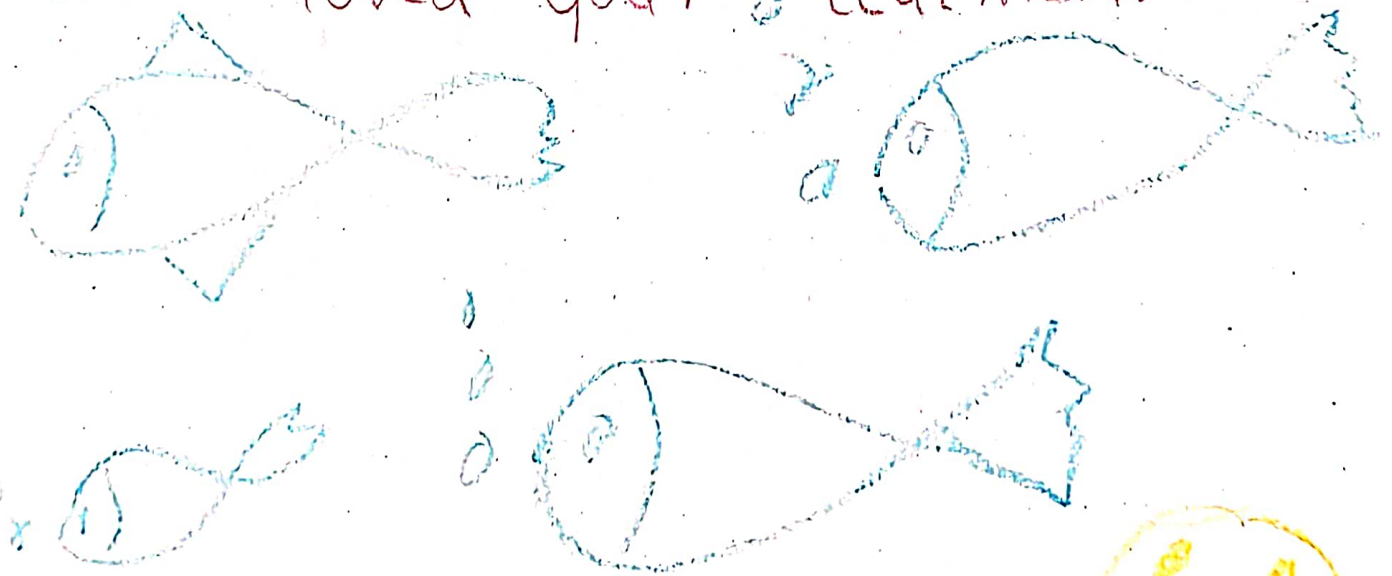

Your Pt
Dheer (4th / 11)

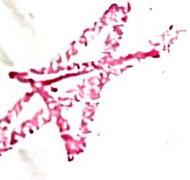

THANK U DR

My name is Naira, we
loved your treatment.

Hello, I am Arman
